We are a Smaller Care Facility, Community Home that provides residents with supportive services and assistance with their activities of daily living (ADLs). ADLs include things like bathing, eating, hygiene, dressing, ambulation, meals, medications, and more. Assisted Living Services may also include basic First-Aid, Medical Monitoring, Medical Support and more.

Nursing homes are a clinical setting. Smaller Care Facility are more of a home environment. It offers a smaller setting with more personalized care.

A benefit of a Smaller Community Facility is that your private caregiver is there to help when needed. Living alone or living with someone who does not qualify, not capable or due to work, illness, family obligation or for other means; is not able to share daily responsibilities like dressing, bathing, cleaning, cooking, doctors appointment, safety, and so forth.

The goal of Home Assisted Living is to accommodate each individuals' changing needs while maximizing dignity, maintaining autonomy, and promoting safety. At JenLee Living Facility, our residents do not have to worry about finding a ride to their appointments. We provide a safe living environment. We provide 24 hour supervised care, and our residents retain a certain level of autonomy.

We offer both a semi-private and private room choice as well as communal areas for residents to enjoy activity schedule, social opportunities and peace of mind.
